

NEW

GT Stay Guard Elite

Due to the likelihood of changes for window testing standards in the future, we have redesigned our Stay Guard. The changes have also been brought about due to customer demands wanting better versatility and a more aesthetically pleasing appearance to the product.

Stay Guard Elite is available in two sizes to accommodate both 13mm and 17mm stack height systems. The new design has also endeavoured to encompass all stay options to include Easy Clean and Egress. Both are finished to our normal high standard of coating.
