GT Guardian for windows

Patent pending

Fit Guardian in the hinge area as shown in this diagram approximately 75mm centred from the corner.

We recommend 4.8 X 25mm Pan Head screws

GT Guardian is a revolutionary design in door and window hinge protection systems.

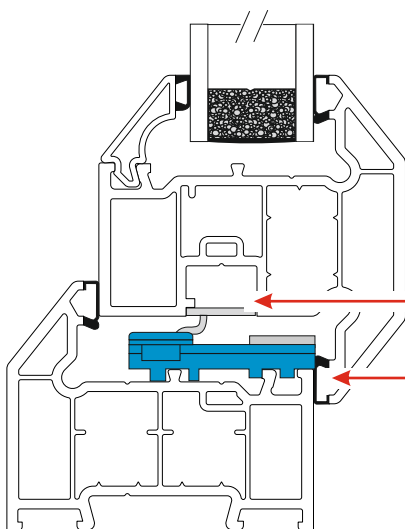

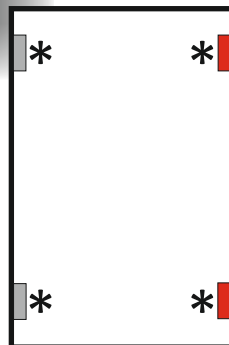

The parts for windows consist of three acetyl profile related mouldings, one acetyl name plate and two high tensile steel components.

The unique design enables it to be fixed directly to the frame and sash without any need for routing.

The acetyl Name Plate allows for personalising with company name or brand name.

This product will offer a high security rating for windows when tested to UK and European standards.

Fit run up blocks  on opposite side to the Stay Guard Elite and pack the unit at the same positions marked * to stop sash movement.

SG036/35 Stay Guard Elite

GU001/2/3 Frame Packer with GU007 Frame Plate and GU005 Name Plate

A full list of profile related packers showing which one to use on system profiles is available to read

All fixings, where possible, should go into steel reinforcing.

All drawings are not to scale
Reinforcement and fixings have been omitted for clarity
UK Fasteners screws were used for testing when required
